

POWER TRANSMISSION PRODUCT RANGE METAL

TO THE TABLE OF CONTENTS 

PRME-18
EFFECTIVE
FROM
01.04.2018

A man with a beard and brown hair, wearing a blue and black plaid shirt under a bright yellow high-visibility safety vest. He has red ear protection around his neck. He is holding a white clipboard with a pen and a pair of black work gloves. The background is a bright, industrial-looking space with a grid ceiling.

“Precision for
your drive.”

Norbert, 42, Foreman

Types V-Grooved Pulleys:

We reserve the right to make technical changes.

Balancing:

The list prices apply, to cast iron pulleys balanced in one plane as follows: Grade G 6,3 for $\varnothing d_d \leq 400$ mm at $n = 1500$ rpm, for $\varnothing d_d > 400$ mm at $v = 30$ m/sec.

Balancing is carried out minus the key on a smooth mandrel. Machines where the rotors are balanced with an adjusting spring inserted in the shaft end must be ordered as follows: "Balanced with finished bore without key on a smooth mandrel without inserted spring".

We recommend balancing in two planes grade G 16 or better if $v \geq 30$ m/sec. or if the ratio between datum diameter and pulley face width $d_1 : b_2 < 4$ at $v > 20$ m/sec. Surcharges for balancing on request. Please give pulley operating speed.

Surcharges for finished bore H7 and keyway to DIN 6885 part 1
